*Preface*

*page xiii*

<b>1</b>	<b>Background</b>	1
	1.1 Smart Grids	1
	1.1.1 Definitions	1
	1.1.2 Benefits	2
	1.1.3 Smart Grid Sensors	2
	1.2 Basic Concepts in Power Systems	3
	1.2.1 AC Voltage and Current	3
	1.2.2 Phasor Representation	4
	1.2.3 Impedance and Admittance	5
	1.2.4 Instantaneous Power and Complex Power	7
	1.2.5 Three-Phase Systems	9
	1.2.6 Transformers	12
	1.2.7 Per Unit Normalization	14
	1.2.8 Power Quality	15
	1.2.9 AC to DC Conversion and DC to AC Conversion	16
	1.3 Different Sectors in a Power Grid	17
	1.3.1 Transmission and Distribution	17
	1.3.2 Generation	23
	1.3.3 Consumption	26
	1.3.4 Storage	26
	1.4 Overview of Chapters 2 to 7	28
	Exercises	31
<b>2</b>	<b>Voltage and Current Measurements and Their Applications</b>	38
	2.1 Instrument Transformers	38
	2.1.1 Turn Ratio	38
	2.1.2 Load Rating and Burden	39
	2.1.3 Three-Phase Systems	40
	2.2 Non-Contact Voltage and Current Sensors	40
	2.2.1 Different Working Principles	41
	2.2.2 Power Harvesting	42
	2.3 Sampling Rate, Reporting Rate, and Accuracy	42

2.3.1	Sampling Rate	42
2.3.2	Reporting Rate	43
2.3.3	Accuracy	44
2.3.4	Impact of Averaging Filters	45
2.4	RMS Voltage and Current Profiles	46
2.4.1	Daily Profiles	47
2.4.2	Histograms and Scatter Plots	49
2.5	RMS Voltage and Current Transient Responses	52
2.5.1	Transient Responses Caused by Faults	52
2.5.2	Transient Responses Caused by Equipment Actuations	53
2.6	RMS Voltage and Current Oscillations	54
2.6.1	Wide-Area Oscillations in Power Transmission Systems	55
2.6.2	Local Transient Oscillations in Power Distribution Systems	56
2.6.3	Modal Analysis of Oscillations	57
2.7	Events in RMS Voltage and Current Measurements	62
2.7.1	Transient Events versus Sustained Events	63
2.7.2	Event Detection Methods	64
2.7.3	Events in Other Types of Measurements	68
2.8	Three-Phase Voltage and Current Measurements	68
2.8.1	Three-Phase RMS Profiles	68
2.8.2	Measuring Phase Unbalance	70
2.8.3	Phase Identification	70
2.9	Measuring Frequency	73
2.9.1	Generation-Load Imbalance	73
2.9.2	Frequency Oscillations	75
	Exercises	76
<b>3</b>	<b>Phasor and Synchrophasor Measurements and Their Applications</b>	<b>83</b>
3.1	Measuring Voltage and Current Phasors	83
3.1.1	Phasor Calculation Using Discrete Fourier Transform	83
3.1.2	Time Reference to Measure Phase Angle	84
3.2	Time Synchronization and Synchrophasors	85
3.2.1	Precise Time Synchronization	85
3.2.2	Application of Time Synchronization	87
3.2.3	Different Types of PMU Technologies	87
3.2.4	Synchrophasor Data Concentration	88
3.3	Nominal and Off-Nominal Frequencies	88
3.3.1	Impact of Frequency on Measuring Phase Angle	89
3.3.2	Rate of Change of Frequency	91
3.3.3	Synchronized Frequency Measurements	93
3.4	Relative Phase Angle Difference	94
3.4.1	Approximate Relationship Between RPAD and Power Flow	94
3.4.2	Sustained and Transient Events in RPAD	96
3.4.3	Impact of Inter-Area Oscillations on RPAD	96

---

3.5	Phasor Differential and Differential Synchrophasors	98
3.5.1	Phasor Differential Calculation	98
3.5.2	Impact of Off-Nominal Frequency on PD Calculation	99
3.5.3	Differential Synchrophasors	100
3.5.4	Application in Event Location Identification	101
3.6	Three-Phase and Unbalanced Phasor Measurements	106
3.6.1	Symmetrical Components	106
3.6.2	Unbalanced Events	109
3.6.3	Voltage Unbalance Factor	109
3.6.4	Phase Identification	110
3.7	Events in Phasor Measurements	111
3.7.1	Analysis of Events in Phase Angle Measurements	111
3.7.2	Event Classification	114
3.8	State and Parameter Estimation	121
3.8.1	State Estimation Using PMU Measurements	122
3.8.2	Parameter Estimation Using PMU Measurements	125
3.8.3	Topology Identification Using PMU Measurements	126
3.9	Accuracy in Synchrophasor Measurements	128
3.9.1	Performance Classes	129
3.9.2	Steady-State Performance	129
3.9.3	Dynamic Performance	130
3.9.4	Accuracy of Three-Phase Synchrophasors	133
3.9.5	Accuracy of RPAD and PD	133
	Exercises	134
<b>4</b>	<b>Waveform and Power Quality Measurements and Their Applications</b>	<b>140</b>
4.1	Steady-State Waveform Distortion	140
4.1.1	Measuring Harmonics	141
4.1.2	Measuring Inter-Harmonics	144
4.1.3	Measuring Notching	146
4.2	Event-Triggered Waveform Capture	147
4.2.1	Comparing THD	148
4.2.2	Comparing RMS	149
4.2.3	Point-to-Point Comparison	150
4.2.4	Comparing Sub-Cycle RMS	151
4.2.5	Differential Waveform	151
4.2.6	Neutral Current Waveform	154
4.2.7	Other Factors and Methods	155
4.3	Analysis of Events and Faults in Waveform Measurements	155
4.3.1	Faults in Underground Cables	156
4.3.2	Faults in Overhead Lines	157
4.3.3	Faults in Transformers	159
4.3.4	Faults in Capacitor Banks	159
4.3.5	Faults in Other Devices and Equipment	161

4.3.6	Impact of Faults on DERs	162
4.4	Features and Statistical Analysis of Waveform Events	164
4.4.1	Angle, Magnitude, and Duration	165
4.4.2	Number of Affected Phases	167
4.4.3	Transient Oscillations	168
4.4.4	Transient Impulses	169
4.4.5	Fault-Specific Features	169
4.4.6	Changes in Steady-State Characteristics	171
4.4.7	Time, Season, and Location	172
4.4.8	Other Features	172
4.5	Harmonic Synchrophasors	173
4.5.1	Harmonic State Estimation	174
4.5.2	Topology Identification	177
4.5.3	Differential Harmonic Synchrophasors	179
4.6	Synchronized Waveform Measurements	180
4.6.1	Relative Waveform Difference	180
4.6.2	Modal Analysis of Synchronized Transient Waveforms	183
4.7	Accuracy in Waveform Measurements	184
4.7.1	Impact of Noise and Interference	184
4.7.2	Relative Mean Squared Error	186
	Exercises	186
<b>5</b>	<b>Power and Energy Measurements and Their Applications</b>	<b>191</b>
5.1	Measuring Power	191
5.1.1	Active Power	193
5.1.2	Power Profile	195
5.2	Measuring Reactive Power and Power Factor	197
5.2.1	Reactive Power and Power Factor Profiles	197
5.2.2	Apparent Power	198
5.2.3	True Power Factor	199
5.3	Measuring Energy	200
5.3.1	Fixed Intervals	201
5.3.2	Fixed Increments	201
5.3.3	Net Energy Metering and Feed-In Energy Metering	202
5.4	Smart Meters and Their Applications	203
5.4.1	Price-Based Demand Response	203
5.4.2	Incentive-Based Demand Response	207
5.4.3	Energy Usage Clustering	209
5.4.4	Other Applications of Smart Meter Measurements	212
5.5	Advanced Metering Infrastructure	214
5.5.1	AMI Communications Networks	214
5.5.2	AMI Data Management Systems	215
5.6	Disaggregation and Sub-Metering	215
5.6.1	Load Disaggregation	215

---

5.6.2	Net Load Disaggregation	219
5.6.3	Sub-Metering	221
5.7	Load Modeling	222
5.7.1	Static Load Model	222
5.7.2	Dynamic Load Model	225
5.8	State Estimation Using Power Measurements	227
5.8.1	Basic Nonlinear Formulation	227
5.8.2	Linearized Approximate Formulation	231
5.8.3	Convex Relaxation and Other Formulations	233
5.9	Three-Phase Power and Energy Measurements	234
5.9.1	Two-Wattmeter Method	234
5.9.2	Phase Identification	235
5.9.3	Other Applications of Three-Phase Power and Energy Measurements	238
5.9.4	Three-Phase Apparent Power and Power Factor	239
5.10	Accuracy in Power and Energy Measurements	239
5.10.1	Accuracy Classes	239
5.10.2	Meter Accuracy versus System Accuracy	240
5.10.3	Other Factors that Affect Accuracy	242
	Exercises	243
<b>6</b>	<b>Probing and Its Applications</b>	<b>248</b>
6.1	State and Parameter Estimation Using Probing	248
6.1.1	Enhanced Observability	248
6.1.2	Enhanced Redundancy	253
6.2	Topology and Phase Identification Using Probing	253
6.2.1	Topology Identification	253
6.2.2	Phase Identification	255
6.3	Model-Free Control Using Probing	255
6.4	Modal Analysis with Probing	257
6.4.1	Probing with Resistive Brake	258
6.4.2	Probing with Intermittent Wave Modulation	259
6.4.3	Input–Output System Identification	260
6.5	Power Line Communications as a Probing Tool	261
6.5.1	Basics of Power Line Communications	262
6.5.2	Signal Attenuation and Channel Estimation	263
6.5.3	Signal Reflection at Impedance Discontinuities	264
6.5.4	Applications to Power System Monitoring	264
6.6	Fault Location Identification Using PLC	264
6.7	Topology and Phase Identification Using PLC	267
6.7.1	Topology Identification Using PLC	267
6.7.2	Phase Identification Using PLC	269
	Exercises	270

<b>7</b>	<b>Other Sensors and Off-Domain Measurements and Their Applications</b>	275
7.1	Device and Asset Sensors	275
7.1.1	Transformers	275
7.1.2	Capacitor Banks	277
7.1.3	Line Conductors	278
7.1.4	Wind Turbines	279
7.1.5	Solar Panels	280
7.1.6	Batteries	282
7.2	Building Sensors	283
7.2.1	Occupancy	283
7.2.2	Temperature and Illuminance	286
7.2.3	Electric Vehicles	287
7.3	Financial Data	290
7.3.1	Pricing and Billing	290
7.3.2	Electricity Market	291
7.4	Images, LIDARs, Drones, and Robots	292
7.4.1	Images	292
7.4.2	LIDARs	293
7.4.3	Drones and Robots	294
7.5	Other Off-Domain Measurements	294
	Exercises	295
